-John Deere Foundry
Oil Lagoon Abandonment

File

Mr. John E. Smith
Environmental Control
Deere and Company
John Deere Road
Moline, Illinois 61265

Dear Mr. Smith:

The purpose of this letter is to confirm our September 20, 1982 telephone conversation, regarding your August 27, 1982 letter, in which we discussed and agreed upon the method to be utilized in abandonment of the subject oil lagoons as follows:

1. Both lagoons are to be filled with foundry sand and two feet of final cover is to be provided. It is agreed that final cover can consist of foundry sand if this practice is allowed under your current Division of Land Pollution Control permit for disposal of foundry sand.
2. Surface water will be diverted around these two lagoons.
3. An Agency permit will not be required for this project since the fill material is generated on your property and not considered a hazardous waste.

As agreed, you will send to this office a letter confirming the above procedures. Should you have any questions or comments regarding this letter, please feel free to contact me.

Very truly yours,

ENVIRONMENTAL PROTECTION AGENCY
